Important information and safety tips on the reverse side.

## PROJECT STAGES

1

### Design

The *design* stage is when technical staff plan on how to get the new power supply to your home or business.

2

### Civil

The *civil* stage is when crews dig into the ground and place new poles and underground conduits.

3

### Electrical

The *electrical* stage is when crews switch over the supply from the old to the new system.

### Planned Power Interruptions

- Throughout this project, planned power outages may be necessary when switching from the old to the new electrical system. We will always provide you with advance notice of these outages.

## WORK DETAILS

### What to expect

- While Toronto Hydro will make every effort to reduce the impact of construction on your community, you may experience dust, noise and other inconveniences as a result of the work on this project. We appreciate your patience as we work to improve the reliability of service in your neighbourhood.

### Work hours

- The work on this project will generally take place Monday to Friday, between 7 a.m. and 7 p.m. However, some weekend work may occur.

### Road and sidewalk access

- In order to complete work in a safe manner, there may be road and sidewalk restrictions within the construction work area. In the event of any parking restrictions in your community, advance notice will be provided.

### Tree trimming/vegetation

- To accommodate the new electrical infrastructure, trees may need to be trimmed on city property. Crews will take extra care and precautions when doing this work. To ensure the safety of our crews and equipment, we kindly ask that customers refrain from planting landscaping (shrubs, trees, flowers, etc.) near Toronto Hydro infrastructure, as crews require unobstructed access to our equipment.

## SAFETY TIPS

### Public safety is our top priority and everyone plays an important role:

- Never enter a construction area marked by fences or safety cones
- Be visible at all times and make eye contact with people operating equipment
- Be aware of your surroundings and avoid distractions
- Follow all safety signage, even if there are no construction workers around
- Walk on the sidewalk or designated walkway
- Ask for assistance to walk around the construction area if preferred
- Watch your step! Always be prepared for unexpected hazards
- Report anything that looks dangerous to a construction site worker, or call 416-542-8000
